KIA

Model: Picanto;

Year: 2017>

Kit content: single DIN facia plate
mounting with single DIN device + screws

Customer code:

INSTALLATION MANUAL

1 This is the original configuration.

2 Remove and save the circled plastic part as shown in the picture.

3 Remove and save the the plastic parts as shown in the picture.

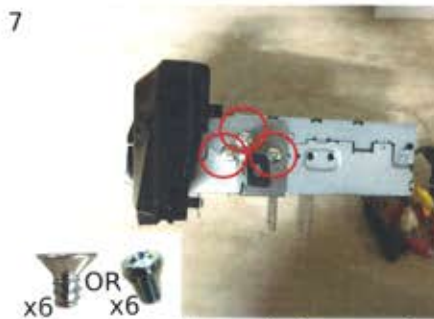

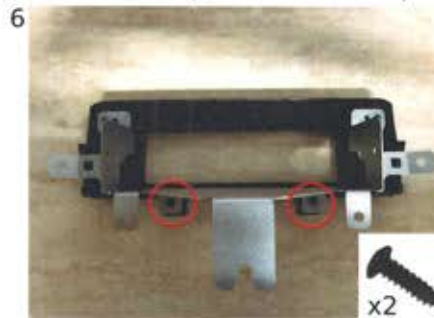

4 Remove and save the air-vents and the hazard lights button as shown in the picture.

5 Remove and save the original head unit by unscrewing the screws as shown in the picture from each side of the radio and the bolt as shown in the pictures.

6 Take the supplied bracket and fix it on the supplied facia plate with the supplied screws. See the picture to check the position of the screws.

7 Take the bracket previously fixed and fix it on the aftermarket radio unit with the supplied screws (choose the appropriate type of screw between the two types supplied, see the picture below) on each side of the radio. See the picture to check the position of the screws.

8 Connect all cables, verify the proper functioning of the system and insert the unit into the radio tunnel. Fix it with the screws saved and the bolt before as shown in the pictures.
