mounting brackets + screws

Compatibility:

Customer code:

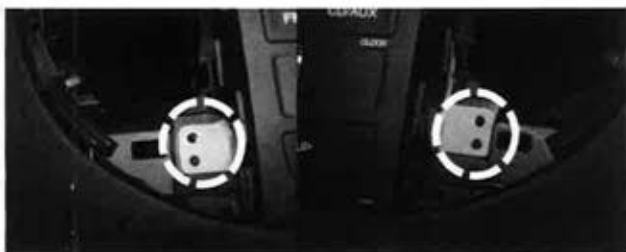

INSTALLATION MANUAL

All installation work must be performed by a qualified professional installer only.
The manufacturer / dealer is not liable for any kind of incidental or indirect damages.

1 Remove the two air vents on the sides of the original radio unit.

2 Remove the two screws on the left and right side and remove the radio unit.

3 Remove and save the 6 clips on the rear panel of the radio unit.

4 Remove the hazard lights button and save the screws.

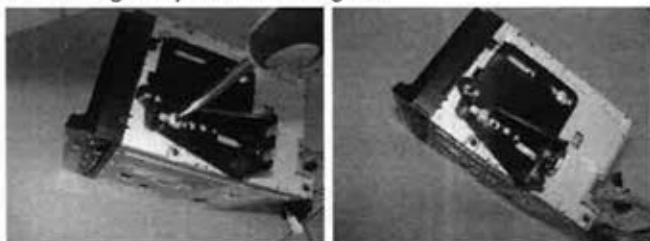

- 5 Place the 6 clips of step 3 and the hazard lights button on the facia plate using the two fixing screws saved at step 4.

- 6 Insert the display cover in the facia plate.

- 7 Mount brackets on both sides of the aftermarket radio using supplied screws. To have a chance of better vertical centering of the radio unit we suggest to install two screws diagonally as shown in figure.

- 8 Place the unit into the compartment and secure it to the panel with screws saved at step 2.

- 9 Put back in place the air vents, the hazard lights button and insert the facia plate.
This is the final result.
